vegan formula

Natural essential oils

Zero waste glass jar

5 Steps to Make Your Own **Scented Deodorant**

Customise the Pure deodorant with your favourite essential oil.

1. Pour water into a pot and place the open jar of deodorant in it.
2. Heat the pot on low flame, keeping it below boiling point, and let the deodorant melt in the water bath for a maximum of 5-7 minutes.
3. While heating, stir the deodorant with a thin, clean tool, such as a wooden spatula or a toothpick.
4. Using a kitchen mitten, carefully remove the deodorant from the water bath, add 13 drops of essential oil, and mix thoroughly.
5. Allow the deodorant to set for at least 1 hour at room temperature.

You will need:

essential oil + Pure deodorant + pot + kitchen mitten
+ spatula or toothpick

How do the key ingredients

of BEWIT Deodorants work?

Tapioca starch

Absorbs moisture (sweat), keeps the skin dry, and leaves it smooth.

Gemma Complex

Provides soothing and nourishing benefits. Supports circulation. Harmonises.

Almond oil

Hydrates and soothes the skin. Supports its elasticity.

Magnesium hydroxide

Balances the skin's pH level, prevents the growth of bacteria, and eliminates odour. Does not clog pores.

Essential oils

Have natural antibacterial properties. Pleasant aroma. Holistically affect body, mind, and spirit.

Coconut oil

Nourishes, cleanses, and softens the skin. Has antibacterial properties.

Body Butters (Shea, Cocoa)

Protect and hydrate the skin. Create a gentle protective layer.
